Hi Lenny, I wanted to confirm that you received my March 27 email and vmail message that EPA will hold public information sessions on the draft feasibility study. We will need to reschedule our meeting with the Business Association for a later date. Thank you, Alanna 503.326.6831

Please see the attached EPA Newsletter: Learn more about the Portland Harbor Superfund Site Cleanup EPA Public Information Sessions for Portland Harbor Draft Feasibility Study  
The United States Environmental Protection Agency (EPA) is now reviewing the draft Feasibility Study for the Portland Harbor Superfund Site. It is also now available for review by the public at the Multnomah County Central Library, 801 SW 10th Ave., or from the EPA website at [www.epa.gov/region10/portlandharbor](http://www.epa.gov/region10/portlandharbor).  
Under the direction of EPA, a group of potentially responsible parties known as the Lower Willamette Group (LWG) prepared the feasibility study. The study compares options to clean up Portland Harbor. These options will help manage contaminated soil and river sediment.

EPA will hold four public information sessions to provide an overview of the draft feasibility study. These sessions will include:

- Information about cleanup alternatives
- Site background information
- Discussion of effect on the community
- Next steps for making clean up decisions
- Opportunities for public involvement

In addition, open houses are scheduled before each session. During these open houses, you can speak with representatives from EPA, Oregon Department of Environmental Quality, LWG, Tribal governments, Natural Resource Trustees and the Portland Harbor Community Advisory Group.
